Sajad Rahimi

Senior PHP Full Stack Developer / Team Lead

sjd.rhm@gmail.com • +989133888033 • Isfahan, Isfahan, IR

Self-taught senior software developer experienced in building scalable web applications and leading engineering teams. Skilled in PHP (Laravel, Slim, Symfony), Node.js (Express, NestJS), TypeScript, and full-stack development. Designed high-performance search systems, integrated third-party services, and delivered web and mobile platforms. Committed to continuous learning, collaborative teamwork, and improving delivery through agile practices.

Experience

Senior Software Developer / Team Lead

Jan 2020

Iranicard (Paliz Group)

Lead development of Pateh, a booking platform for flights, buses, hotels, tours, and insurance, and contribute to Iranicard international payment services.

- Led a team of 8 developers to design and build more than 25 microservices for the Pateh booking platform.
- Integrated more than 20 third-party flight and hotel booking APIs.
- Built a system capable of handling over 10,000 flight search requests per second.
- Designed a flight search engine that returned results in less than one second in 90% of cases, supporting growth during the first year.
- Improved Iranicard international payment integrations, resolved security issues and bugs, optimized databases, and improved the customer experience.

Full Stack Engineer / Backend Developer

Jan 2019 - Dec 2019

Amreton

Developed backend services and APIs for customer and driver applications on an internet taxi platform that expanded into food delivery, medical assistance, and logistics services.

- Built client and driver APIs with PHP, Laravel, MySQL, Node.js, and Express.
- Optimized travel allocation APIs and migrated communication to WebSocket technology.

- Collaborated through Scrum sprints, daily stand-ups, retrospectives, sprint planning, and demos.

Full-stack Developer

Feb 2015 - Nov 2018

Talamala

Independently developed the Talamala website, two Android applications for users and administrators, and the supporting backend.

- Delivered an integrated website, user Android app, and administrator Android app.
- Built a PHP and MySQL backend for data processing and communication across the platform.
- Developed web interfaces using JavaScript, jQuery, and AJAX.

Freelance Software Developer

Mar 2012 - Dec 2014

Ponisha

Delivered customized websites and software solutions for freelance clients using WordPress, PHP, and JavaScript.

- Developed responsive websites with dynamic functionality and user-friendly interfaces.
- Built tailored solutions using PHP, MySQL, JavaScript, and jQuery to meet client requirements.
- Delivered projects under tight deadlines.

Skills

Backend Development

PHP, Laravel, Symfony, Slim, MVC, Node.js, Express, NestJS, Go, Gin, REST APIs

Frontend Development

JavaScript, TypeScript, Angular, AngularJS, Vue.js, Nuxt.js, HTML, CSS, Bootstrap, SASS, jQuery, AJAX

Databases and Messaging

MySQL, MongoDB, Database Optimization, Caching, Queues, Background Jobs, RabbitMQ

Infrastructure and Delivery

AWS, Linux, Apache, LAMP, CI/CD, Git, GitLab, GitHub, Grafana, Git Workflows

Software Engineering

Microservices, Software Architecture, Software Design, Design Patterns, OOP, SOLID Principles, Clean Code, Code Review, Unit Testing, Integration Testing,

Leadership and Collaboration

Team Leadership, Agile, Scrum, Problem Solving, Management, Communication, Innovation, Planning, Time Management

Scenario Testing, Pull Requests, Merge Requests

Education

Sepahan University

Bachelor in Engineering

Jan 2021 - Jan 2023

Sadjad University

Associate degree in

Jan 2007 - Jan 2010

Projects

Pateh

Booking platform for flights, buses, hotels, tours, and insurance services.

- More than 25 microservices and over 20 third-party booking API integrations.
- Flight search results returned in less than one second in 90% of cases.

Iranicard

International payment services platform.

- Improved payment service integrations, security, database performance, and customer experience.

Amreton

Taxi platform expanded to include food delivery, medical assistance, and logistics services.

Talamala

Website and two Android apps for users and administrators, supported by a PHP and MySQL backend.

Certificates

Developing Back-End Apps with Node.js and Express

Issued by IBM / Coursera

2023

Web Page Development with PHP and MySQL

Issued by Technical Vocational, Isfahan, Iran

2020
