Sajad Rahimi

Technical Lead | Senior Software Engineer | Scalable Systems

sjd.rhm@gmail.com • +989133888033 • Isfahan, Isfahan, IR

Technical lead and senior software engineer with 10+ years of experience building financial, travel, and SaaS platforms. Skilled in distributed systems, microservices, performance optimization, and leading engineering teams across products. Hands-on with PHP/Laravel, Node.js/NestJS, TypeScript, and AI-assisted development. Creator of AI Worker, a self-hosted tool for automating software development and code review.

Experience

Technical Lead / Senior Software Engineer

Oct 2024

Directam

Led architecture and engineering across Directam, Directam Plus, and Avat, modernizing high-volume messaging infrastructure and integrating AI capabilities.

- Led multiple engineering teams and the transition from a monolithic architecture to distributed microservices.
- Increased infrastructure load-handling capacity by more than 100× compared with the previous architecture, enabling horizontal scaling.
- Introduced asynchronous processing and queues using Redis, Laravel Queues, and Horizon while reducing reliance on a central database.
- Implemented centralized logging and monitoring and contributed to AI-powered automated messaging.

Senior Software Engineer / Technical Lead

Jan 2020 - Oct 2024

Iranicard (Paliz Group)

Led engineering initiatives across Iranicard’s financial platform and launched Pateh, a travel booking platform built from the ground up.

- Helped modernize Iranicard’s backend toward microservices; worked on payments, wallets, transaction processing, accounting flows, and financial-data security.

- Started Pateh as its sole developer, then built and led multiple teams as the product expanded.
- Designed and developed 25+ microservices and integrated 20+ APIs for flights, hotels, buses, tours, and travel insurance.
- Built a flight search engine handling 10,000+ requests per second, with sub-second responses for 90% of searches, using caching and search-result management.
- Integrated with Safarmarket, achieving competitive search-result placement through fast API response times.

Full-Stack Engineer / Backend Developer

Jan 2019 - Dec 2019

Amreton

Developed backend APIs and services for a ride-hailing and logistics platform.

- Built passenger and driver services with Laravel and Node.js; improved ride assignment using WebSocket.

Full-Stack Developer

Feb 2015 - Nov 2018

Talamala

Independently developed Talamala's website, two Android applications, and supporting backend.

Freelance Web Developer

Mar 2012 - Dec 2014

Ponisha

Delivered custom web projects using PHP, WordPress, and JavaScript.

Skills

Architecture & Leadership

Software Architecture, Distributed Systems, Microservices, Horizontal Scaling, Technical Leadership, Code Review, Agile/Scrum

Backend & APIs

PHP, Laravel, Node.js, TypeScript, NestJS, Express, REST APIs, Go

Frontend

JavaScript, Vue.js, Nuxt.js, AngularJS, HTML/CSS

Data & Infrastructure

MySQL, PostgreSQL, MongoDB, Redis, RabbitMQ,

AI & Developer Tools

LLMs, AI Agents, Claude Code, OpenAI Codex, Cursor,

Docker, Linux, CI/CD, Grafana, Observability

MCP, GitHub, GitLab

Education

Sepahan University

Bachelor's Degree in Electronic Engineering

Jan 2021 - Jan 2023

Projects

AI Worker

Self-hosted, source-available platform for AI coding agents that automate development tasks and code reviews across GitHub and GitLab.

- Connects Claude Code, Cursor CLI, Codex CLI, and other agents to turn issues into pull or merge requests.
- Supports Docker, GitHub/GitLab, MCP, and CodeGraph.

Certificates

Backend Application Development with Node.js and Express

Issued by IBM / Coursera

2023

Web Development with PHP and MySQL

Issued by Technical and Vocational Training Organization, Isfahan, Iran

2020

Languages

English

Persian (Farsi)

Kurdish

Interests

Software architecture, AI, and open-source projects

Hiking and travel
